

CALL FOR PAPERS

Twenty-fourth Annual IEEE Symposium on **LOGIC IN COMPUTER SCIENCE (LICS 2009)**

August 11–14, 2009, Los Angeles, California, USA

<http://www.informatik.hu-berlin.de/lics/>

Colocated with the 16th International Static Analysis Symposium (SAS 2009), August 9–11

Program Chair:

Andrew Pitts
University of Cambridge, UK
Andrew.Pitts@cl.cam.ac.uk

Program Committee:

Rance Cleaveland, *University of Maryland*
Karl Crary, *Carnegie Mellon University*
Rocco De Nicola, *Univ. degli Studi di Firenze*
Gilles Dowek, *École polytechnique*
Neil Immerman, *University of Massachusetts*
Radha Jagadeesan, *DePaul University*
Claude Kirchner, *INRIA*
Marta Kwiatkowska, *Oxford University*
Benoit Larose, *Concordia University*
Soren Lassen, *Google Inc.*
Leonid Libkin, *University of Edinburgh*
Paul-André Mellès, *CNRS & Univ. Paris Diderot*
Eugenio Moggi, *Università di Genova*
Andrzej Murawski, *Oxford University*
Gopalan Nadathur, *University of Minnesota*
Prakash Panangaden, *McGill University*
Madhusudan Parthasarathy, *UI Urbana-Champaign*
Nir Piterman, *Imperial College London*
Andrew Pitts, *University of Cambridge*
François Pottier, *INRIA*
Vijay Saraswat, *IBM TJ Watson Research Center*
Lutz Schröder, *DFKI-Lab Bremen*
Nicole Schweikardt, *Univ. Frankfurt am Main*
Alwen Tiu, *Australian National University*
Hongseok Yang, *Queen Mary Univ. of London*

Conference Chair:

Jens Palsberg
UCLA
palsberg@ucla.edu

Workshops Chairs:

Adriana Compagnoni, *Stevens Inst. of Technology*
Philip J. Scott, *University of Ottawa*

Publicity Chairs:

Stephan Kreutzer, *Oxford University*
Nicole Schweikardt, *Universität Frankfurt am Main*

General Chair:

Martín Abadi, *Microsoft Research Silicon Valley and University of California, Santa Cruz*

Organizing Committee:

M. Abadi (chair), S. Abramsky, G. Ausiello, F. Baader, S. Brookes, S. Buss, E. Clarke, A. Compagnoni, H. Gabow, J. Giesl, R. Jagadeesan, A. Jeffrey, J.-P. Jouannaud, P. Kolaitis, S. Kreutzer, R. E. Ladner, J. A. Makowsky, J. Marcinkowski, L. Ong, F. Pfennig, A. M. Pitts, N. Schweikardt, P. Scott, M. Veanas

Advisory Board:

R. Constable, Y. Gurevich, T. Henzinger, C. Kirchner, D. Kozen, U. Martin, J. Mitchell, L. Pacholski, V. Pratt, A. Scedrov, D.S. Scott, M.Y. Vardi, G. Winskel

The LICS Symposium is an annual international forum on theoretical and practical topics in computer science that relate to logic broadly construed. We invite submissions on topics that fit under that rubric. Suggested, but not exclusive, topics of interest for submissions include: automata theory, automated deduction, categorical models and logics, concurrency and distributed computation, constraint programming, constructive mathematics, database theory, domain theory, finite model theory, formal aspects of program analysis, formal methods, higher-order logic, hybrid systems, lambda and combinatory calculi, linear logic, logical aspects of computational complexity, logical frameworks, logics in artificial intelligence, logics of programs, logic programming, modal and temporal logics, model checking, probabilistic systems, process calculi, programming language semantics, proof theory, reasoning about security, rewriting, type systems and type theory, and verification. We welcome submissions in emergent areas, such as bioinformatics and quantum computation, if they have a substantial connection with logic.

Important Dates: Authors are required to submit a paper title and a short abstract of about 100 words before submitting the extended abstract of the paper. All submissions will be electronic.

Titles & Short Abstracts Due: January 12, 2009

Extended Abstracts Due: January 19, 2009

Author Notification: March 19, 2009

Camera-ready Papers Due: May 25, 2009.

All deadlines are firm; late submissions will not be considered. Submission is open at <http://www.easychair.org/conferences/?conf=lics09>.

Submission Instructions: Every extended abstract must be submitted in the IEEE Proceedings two-column camera-ready format and may be no longer than 10 pages including reference with a font size of 10pt. The L^AT_EX style files are available at <http://www.cl.cam.ac.uk/users/amp12/lics09/>.

The abstract must be in English and provide sufficient detail to allow the program committee to assess the merits of the paper. It should begin with a succinct statement of the issues, a summary of the main results, and a brief explanation of their significance and relevance to the conference and to computer science, all phrased for the non-specialist. Technical development directed to the specialist should follow. References and comparisons with related work should be included. If necessary, detailed proofs of technical results can be included in a clearly-labelled appendix in the same two-column format following the 10-page extended abstract or there can be a pointer to a manuscript on a web site. This material may be read at the discretion of the program committee. *Extended abstracts not conforming to the above requirements concerning format and length may be rejected without further consideration.*

The results must be unpublished and not submitted for publication elsewhere, including the proceedings of other symposia or workshops. The PC chair should be informed of closely related work submitted to a conference or journal in advance of submission. All authors of accepted papers will be expected to sign copyright release forms. One author of each accepted paper will be expected to present it at the conference.

Short Presentations: LICS 2009 will have a session of short (10 minute) presentations. This session is intended for descriptions of work in progress, student projects, and relevant research being published elsewhere; other brief communications may be acceptable. Submissions for these presentations, in the form of short abstracts (1 or 2 pages long), should be entered at the LICS 2009 submission site in a time frame to be determined.

Kleene Award for Best Student Paper: An award in honour of the late S. C. Kleene will be given for the best student paper, as judged by the program committee. Details concerning eligibility criteria and procedure for consideration for this award will be posted at the LICS website. The program committee may decline to make the award or may split it among several papers.

Affiliated Workshops: As in previous years, there will be a number of workshops affiliated with LICS 2009; information will be posted at the LICS website.

Sponsorship: The symposium is sponsored by the IEEE Technical Committee on Mathematical Foundations of Computing in cooperation with the Association for Symbolic Logic, and the European Association for Theoretical Computer Science.
