

# Process- and Resource-Aware Information Systems

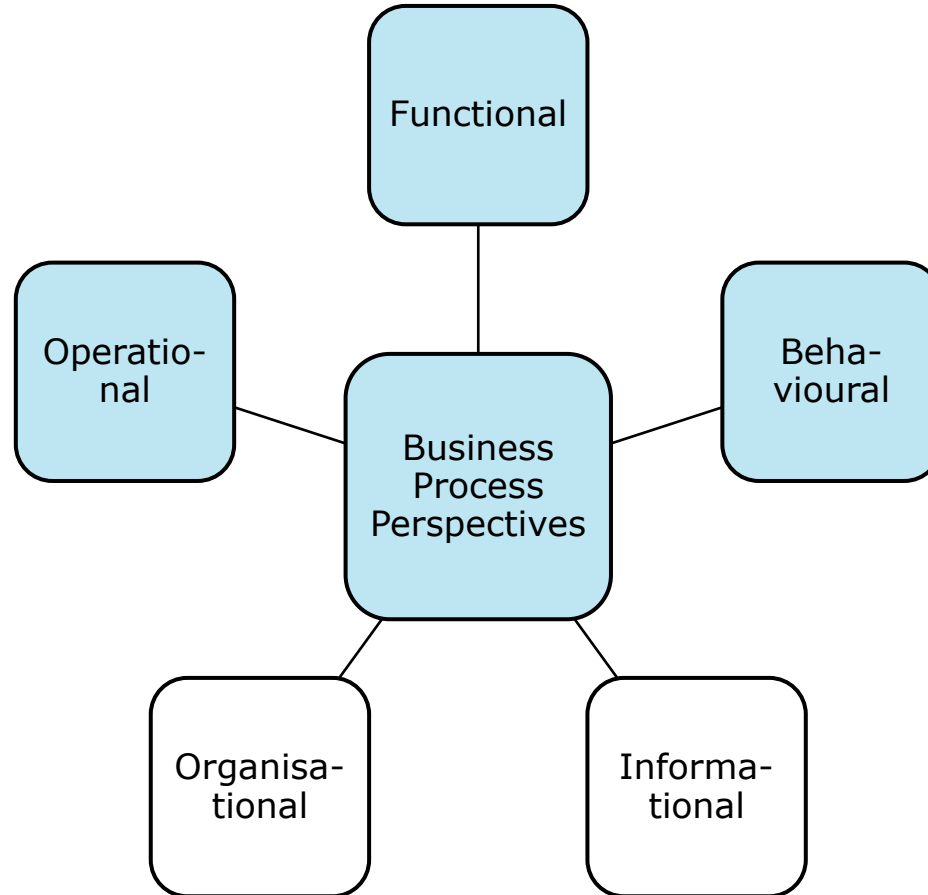

Cristina Cabanillas  
Vienna University of Economics and Business, Austria

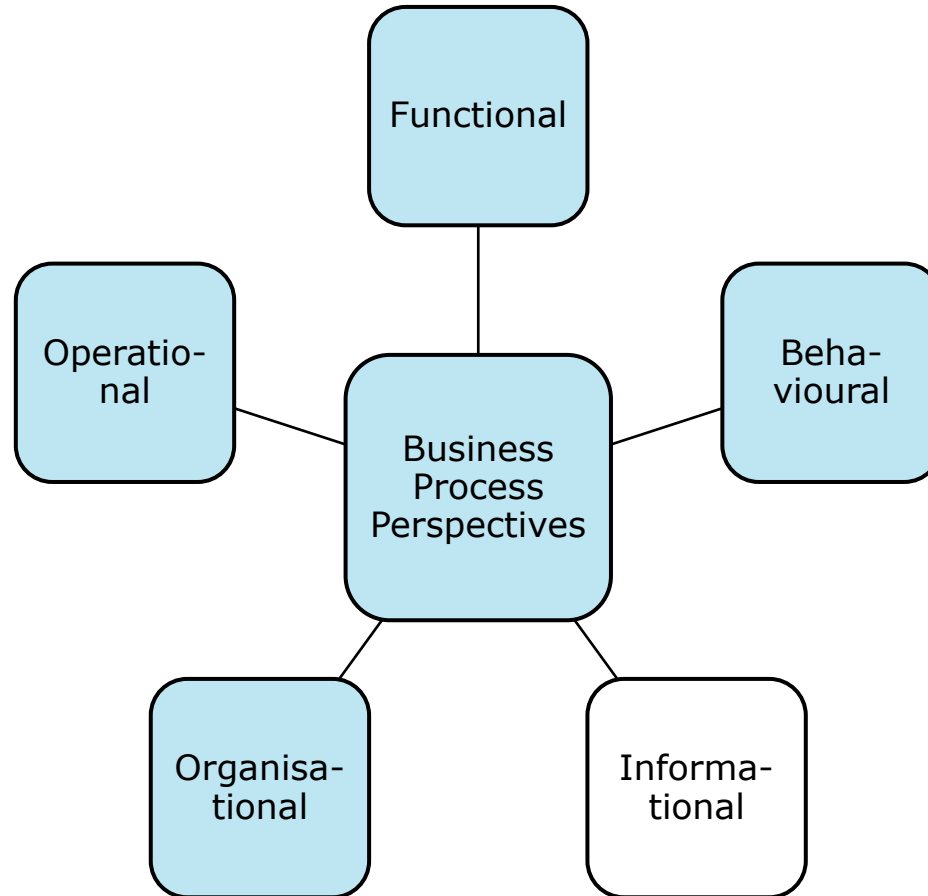

EMISA 2017, @ESSEN, GERMANY

# Motivation – PAIS: Process-Aware Information System

# Motivation – PRAIS: Process- and Resource-Aware Information System

# Research Questions

Which are the **operations**  
involved in human  
resource management in  
business processes?

**RQ1**

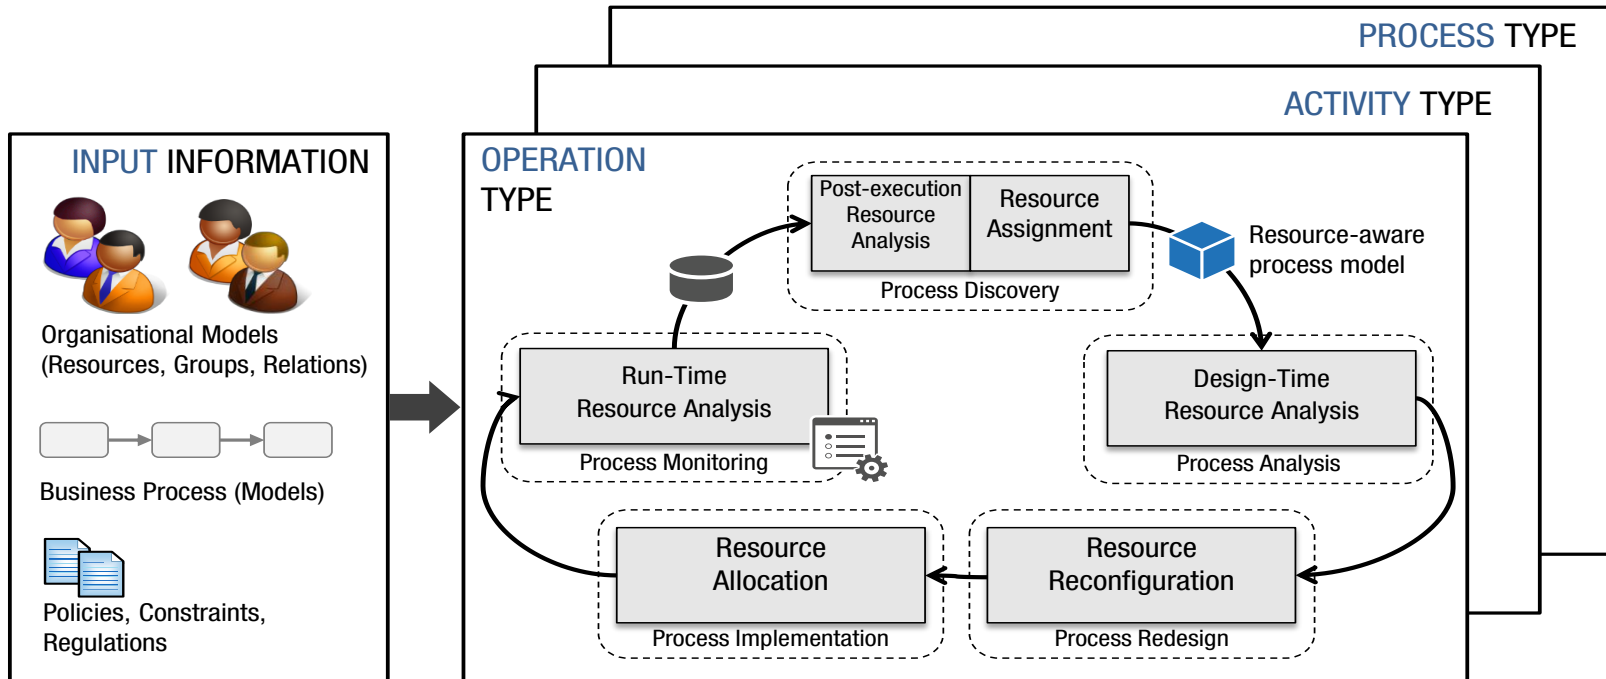

Are there **other factors**  
that affect the way in  
which the operations are  
addressed?

**RQ2**

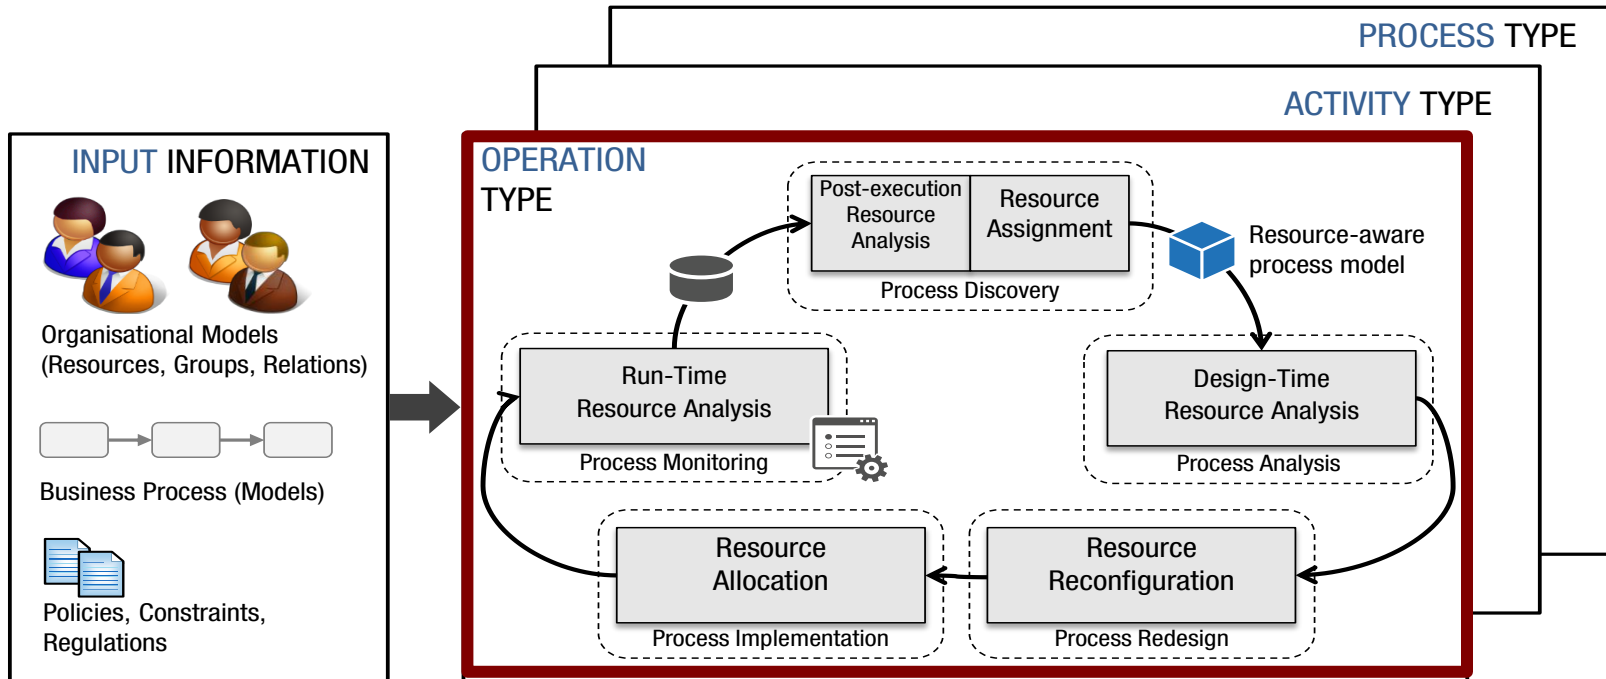

Which is the existing  
**support** on the theoretical  
and practical sides?

**RQ3**

# Framework

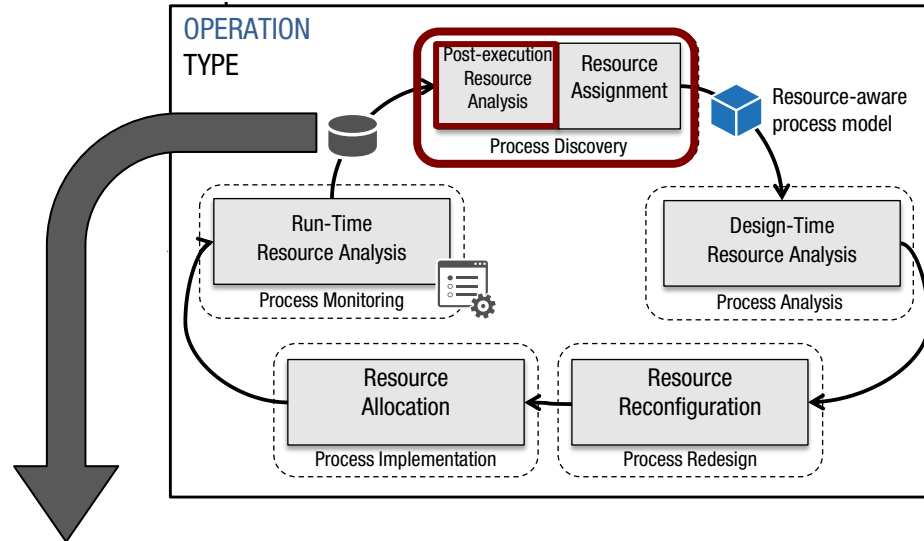

# Framework

RQ1

# Framework – Operation types

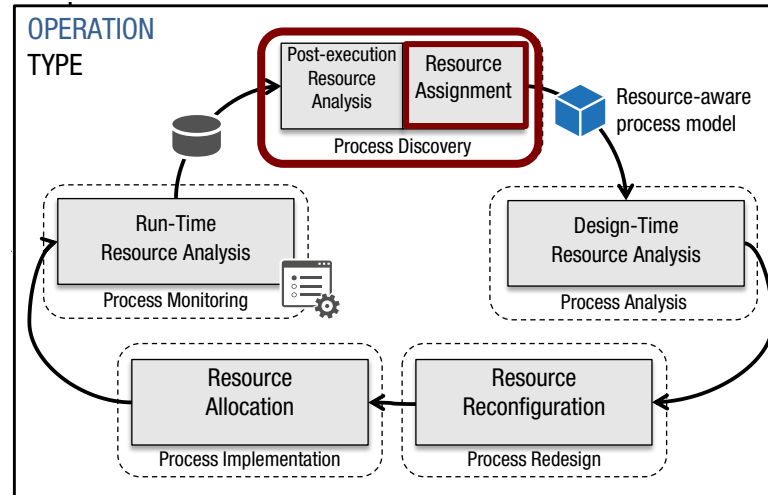

```
<trace>
  <event>
    <string key="org:resource" value="CC"/>
    <date key="time:timestamp" value="2013-08-06T14:..."/>
    <string key="concept:name" value="Request work trip"/>
    <string key="lifecycle:transition" value="start"/>
  </event>
  ...
```

Dumas et al., "Fundamentals of Business Process Management", Springer, 2013

# Framework – Operation types

Imperative process model

Declarative process model

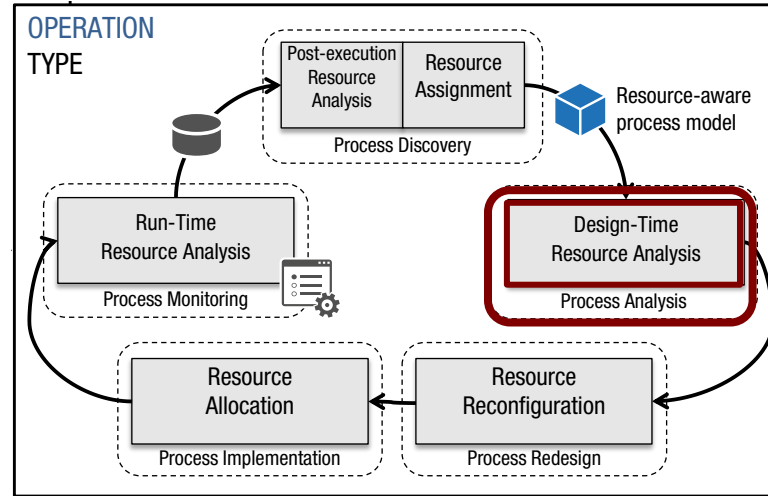

use group Post-Doc  
use group Professor

process WorkTrip {  
 task Request work trip  
 task Approve work trip  
**ensure role(Request work trip, Post-Doc)**  
**ensure role(Approve work trip, Professor)**  
 ensure sequence(Request work trip, Approve work trip)  
}

# Framework – Operation types

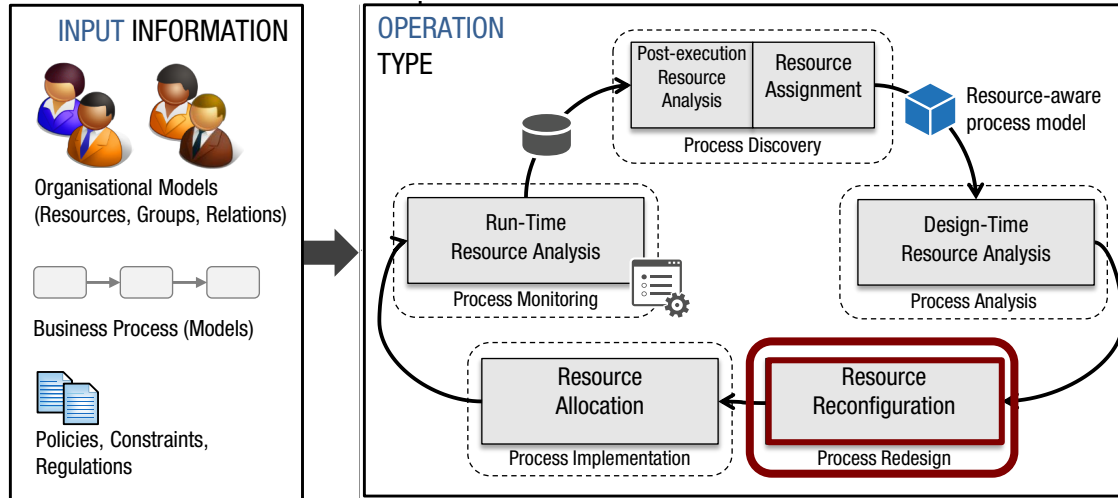

A1. ARS, CDC, JG, CC

A2. No

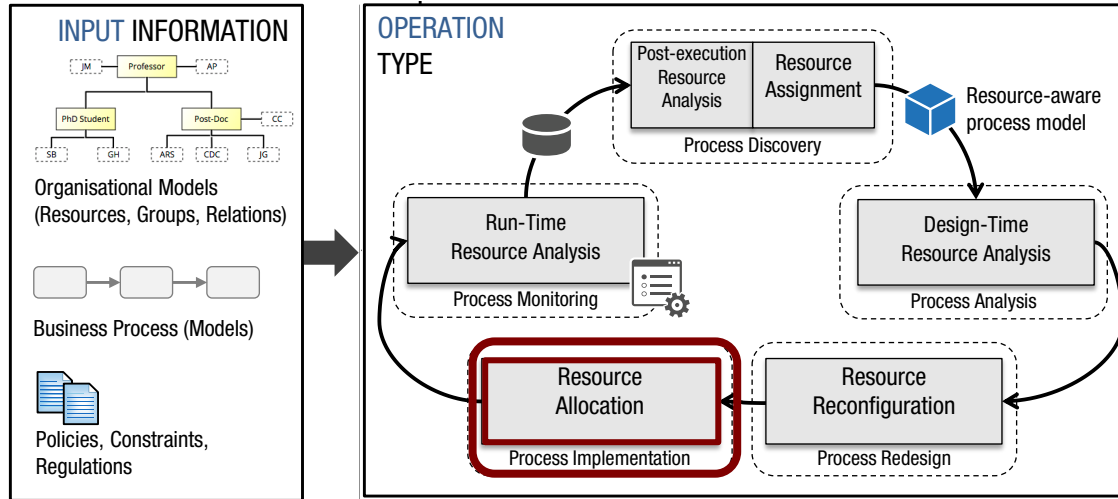

...

Analysis Operations { Q1. Who can request a work trip?  
Q2. Is SB involved in this process?  
...

# Framework – Operation types

# Framework – Operation types

Potential performers:  
ARS, CDC, JG, CC

Optimization  
criteria

Actual performer:  
CDC

# Framework – Operation types

Potential performers:  
JM, AP

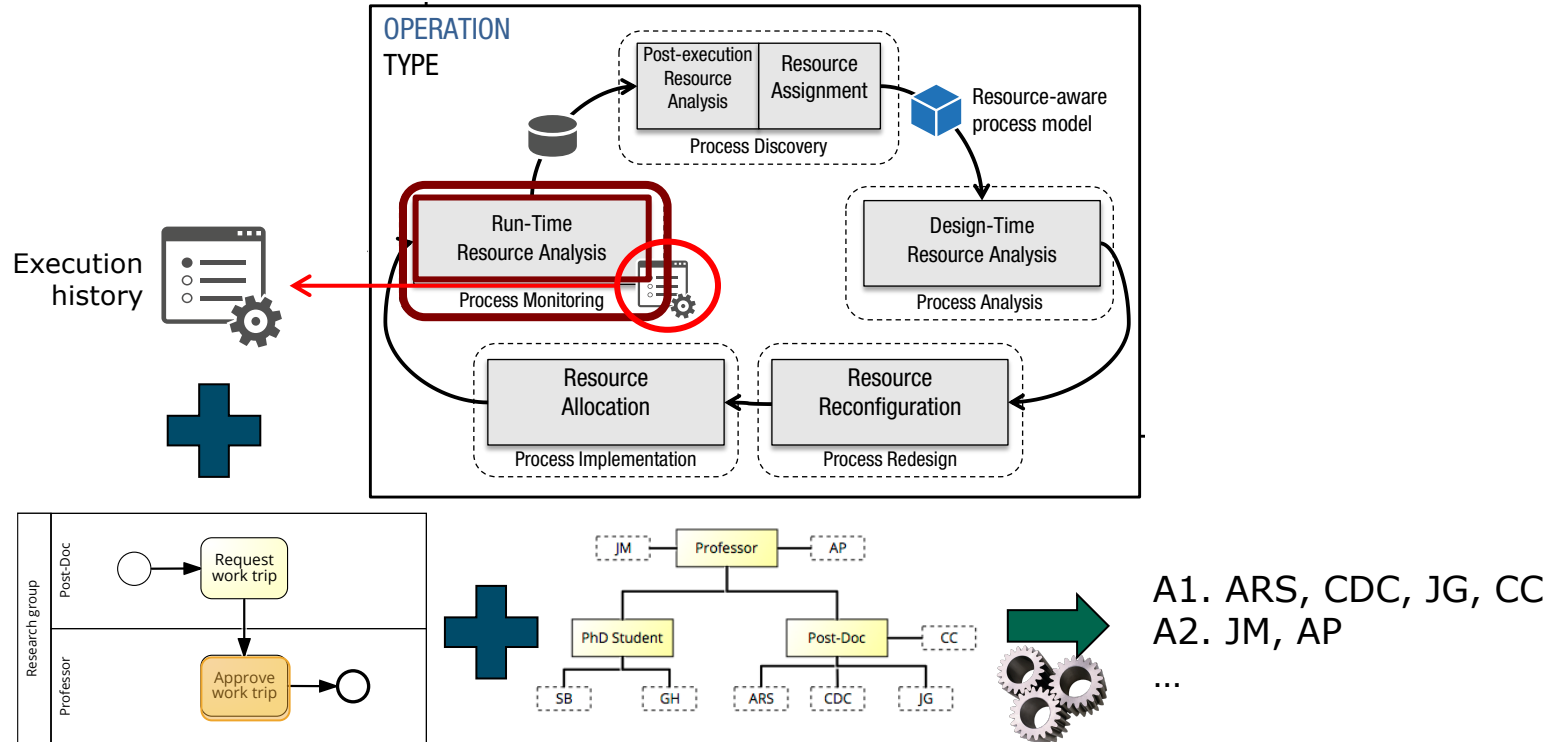

Optimization  
criteria

Actual performer:  
AP

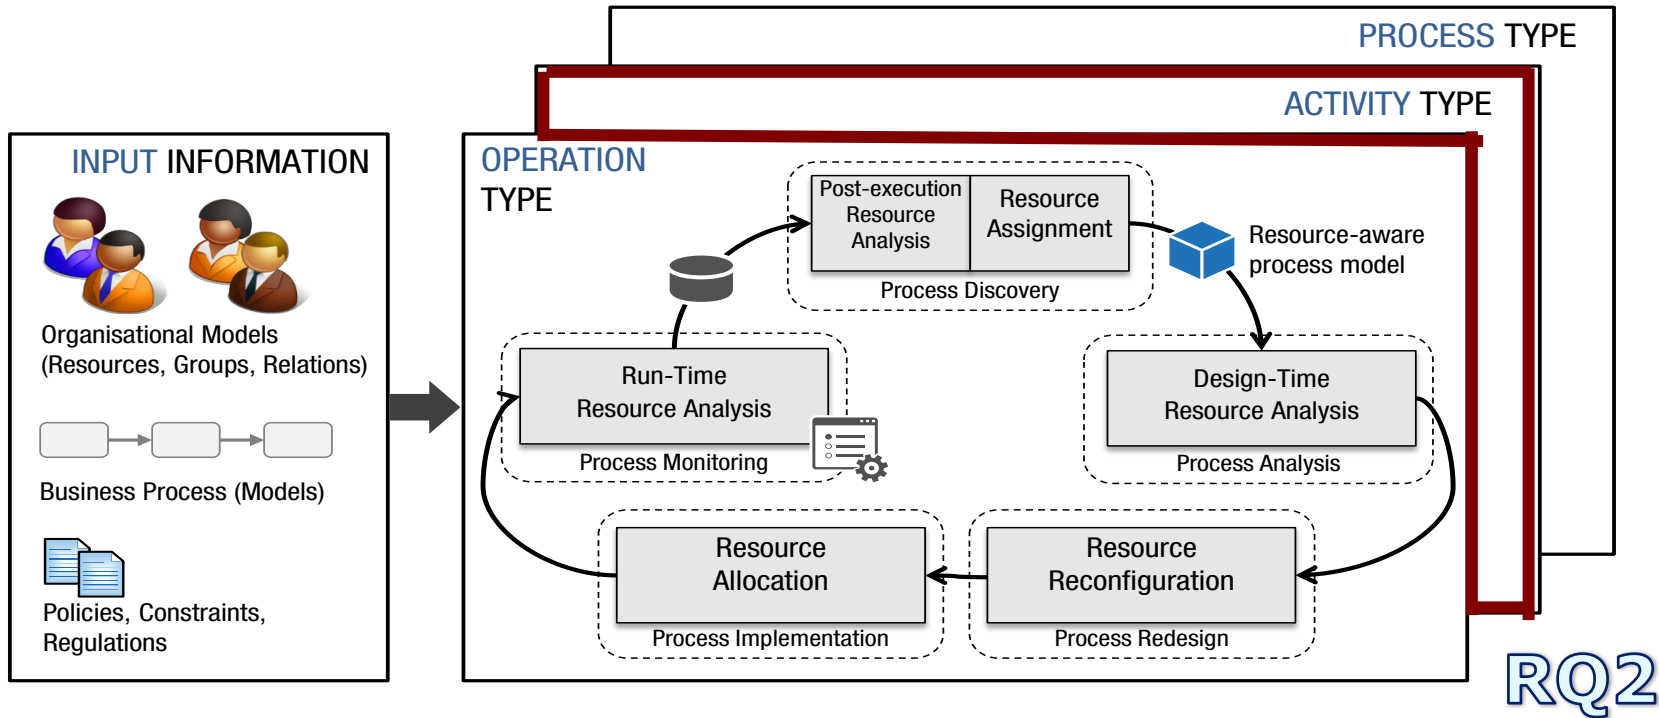

# Framework – Operation types

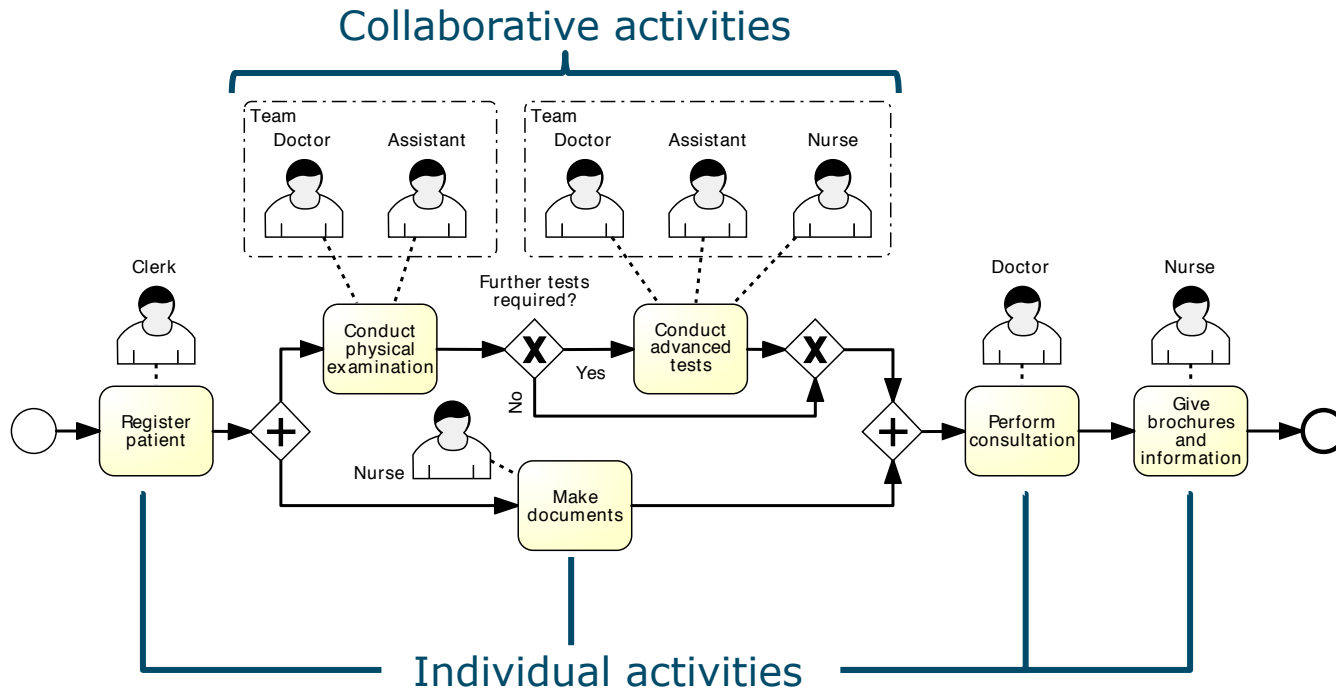

Analysis Operations { Q1. Who can approve a work trip?  
Q2. Who can **still** be involved in this process?  
...

- Framework for moving from PAIS to PRAIS
- 3 aspects affecting resource management: operations, activity types, process types
- Current situation:
  - Most developed operations: resource mining and resource assignment
  - Optimizations in resource allocation convenient in current BPMS
  - Resource analysis hardly supported
  - Conceptual support better than tooling support
- Limitations of this work:
  - No exhaustive systematic literature review
  - Scope of research: BPM

# PRAIS Project

Project  
kickoff  
(01/04  
/2017)

Allocation  
integrated  
with  
individual  
assignments  
(30/11/2017)

Resource  
assignment  
techniques  
validated  
(31/05/2018)

Resource  
mining for  
discovery &  
improvement  
supported  
(31/12/2018)

Individual  
resource  
assignment  
supported  
(30/06/2017)

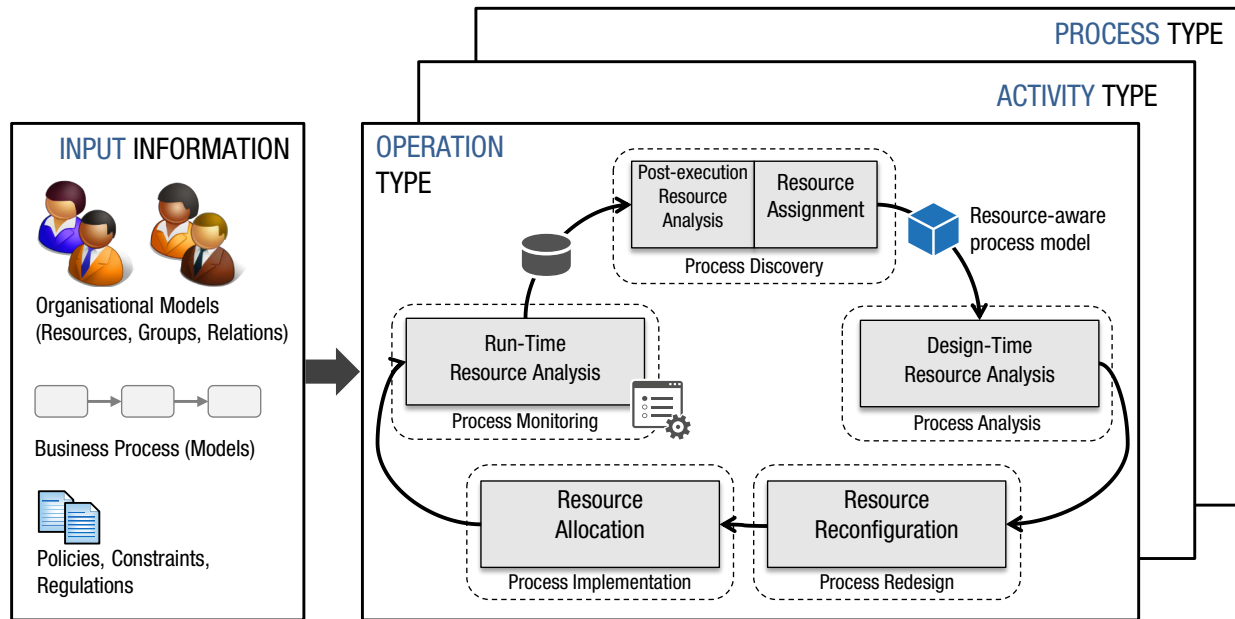

Teamwork  
assignment  
supported  
(31/03/2018  
)

Teamwork  
allocation  
supported  
(31/07/2018)

Continuous  
(re)planning  
supported -  
Project  
completed  
(31/03/2019)
