Preface

This three-volume booklet contains the papers presented at CS&P ’06, the 15th International Workshop on Concurrency, Specification and Programming, CS&P ’06 is held on Wandlitz near Berlin, Germany, on September 27th–29th, 2006.

The CS&P workshop series has been established under this name in 1992; it emerged from a cooperation between Humboldt University Berlin and Warsaw University which dates back to the mid-1970’s. It is being organised in turn by the computer science departments of both universities, and, since 2003, by the University of Information Technology and Management in Rzeszow. CS&P ’06 in addition is partly organised by Fraunhofer FIRST, the Fraunhofer Institute for Computer Architecture and Software Technology, Berlin. ¹

What’s more, the interest in CS&P is steadily growing beyond the range of these institutions: Presently, there are 73 authors from 9 countries. Following its tradition, the meeting nevertheless tries to retain an informal working atmosphere. Therefore, the call for papers welcomed drafts and extended abstracts as well as fully elaborated contributions.

The submissions received in return for the call for papers were each carefully reviewed by at least 2 program committee members or delegate referees. Out of these, the program committee decided to accept 43 contributions. ² The accepted papers were revised according to the referee’s suggestions and are now published in the proceedings at hand as well as on the workshop website (www2.informatik.hu-berlin.de/ki/CSP2006). Additionally, it is planned that selected articles from CS&P ’06 will appear in a special issue of the journal “Fundamenta Informaticae”.

Due to the history of the workshop, this year’s contributions focus on Petri net theory, autonomous agents and robots, logic and model theory, model-based

¹ The CS&P workshop series is being supported by mutual research exchange programs between Germany and Poland. CS&P ’06 gratefully acknowledges the support of DAAD, the German academic exchange service (program “Ostpartnerschaften”) and Mrs. H. Grüneberg of HU Berlin, Abt. Internationales, for special support.
² The organisation of the submission, refereeing and publication process was greatly facilitated by the EasyChair conference management system (www.easychair.org); the organisers would like to thank Andrei Voronkov and his team for this wonderful software.
design and verification, security issues, programming languages, rough sets and other mathematical structures, and the theory of approximation spaces and information systems.

The program committee also decided on Antoni Mazurkiewicz as an invited speaker to deliver a lecture of general interest to the conference participants. Notes for his talk on “Compositional Systems over Reducible Networks” can be found in these proceedings.

However, CS&P ’06 will be memorised by the participants not only for the remarkable scientific program: It takes place in a small village near Berlin close to the famous forest and hunting area “Schorheide”. This is one of Germany’s largest forestal areas, with an exceptional landscape, rare wildlife and recreational possibilities.

Let’s look forward to an exciting workshop event!

Berlin, September 2006

Hans-Dieter Burkhard

# Table of Contents

Preface .................................................. I
Table of Contents ........................................ III
Conference Organisation ................................. VII
List of Referees ......................................... VIII
Author Index ............................................. IX

Invited Talk
Compositional Systems over Reducible Networks ............... 1

*Antoni Mazurkiewicz*

Part 1. CONCURRENCY

**Petri Net Theory**

Interpreted Nets ........................................ 15

*Ludwik Czaja*

Reachable Markings of Object Petri Nets ...................... 26

*Michael Köhler*

On Decidability Problems of a Basic Class of Object Nets ........ 38

*Roxana Dietze, Manfred Kudlek, Olaf Kummer*

Recovery and Reset in Object Petri Nets with Process Markings ....... 47

*Berndt Farwer*

Analysis of Approximate Petri Nets by Means of Occurrence Graphs ..... 58

*Zbigniew Suraj, Barbara Fryc, Grzegorz Owsiany*

Algorithm of Translation of MSC-specified System into Petri Net ........ 68

*Sergii Kryvyi, Lyudmila Matvyeyeva*

Resource Equivalence in Workflow Nets ........................ 80

*Vladimir Bashkin, Irina Lomazova*

Checking Properties of Adaptive Workflow Nets .................. 92

*Kees van Hee, Irina Lomazova, Olivia Oanea, Alexander Serebrenik,
Natalia Sidorova, Marc Voorhoeve*
Autonomous Agents and Robots

Formalising Multi-Agent Organisations ................................................. 104
  Michael Köhler

Modeling Complex Behavior of Autonomous Agents in Dynamic Environments ......................................................... 116
  Ralf Berger, Dieter Burkhard

Humanoid Team Humboldt Team Description 2006 ............................... 126
  Manfred Hild, Matthias Jüngel, Michael Spranger

A Real-Time System for the Evolution and Operation of an Artificial Retina ............................................................. 135
  Andreas Wollstein, Manfred Hild

Simloid - Research on Biped Robots Controller, Using Physical Simulation and Machine Learning Algorithms ..................... 143
  Daniel Hein, Manfred Hild

Part 2. SPECIFICATION

Logic and Model Theory

Combining Propositional Dynamic Logic with Formal Concept Analysis ................................................................. 152
  Nikolay Shilov, Natalia Garanina, Igor Anureev

Towards a Multi-Valued Logic for Argumentation ............................... 162
  Katarzyna Budzynska, Magdalena Kacprzak

A Categorical Account of Bisimulation for Timed Higher Dimensional Automata .............................................................. 174
  Elena Oshevskaya

Semantic Domains for Real-Time Event Structures .............................. 186
  Roman Dubtsov

Model-Based Design and Verification

Towards C# Program Verification: C#-Kernel and it’s Axiomatic Semantics ................................................................. 195
  Valery Nepomniaschy, Igor Anureev, Igor Dubranovsky, Alexei Promsky

SAT-Based Reachability Checking for Timed Automata with Discrete Data ........................................................................ 207
  Andrzej Zbrzezny, Agata Potrola
Towards Promela Verification Using VerICS ................................. 219  
Wojciech Nabiałek, Piotr Dembinski, Pawel Janowski

Development of Embedded Systems – From RTCP-Net Model to Ada  
Code .................................................................................................. 231  
Marcin Szpyrka

Specification Based Software Product Line Testing: A Case Study ...... 243  
Satish Mishra

Security Issues

Verification of the TESLA Protocol in MCMAS-X  ......................... 255  
Bozena Wozna, Alessio Lomuscio, Franco Raimondi

Observation Based Passive and Active Timing Attacks ................. 268  
Damas P. Gruska

Modelling and Checking Timed Authentication of Security Protocols 280  
Gizela Jakubowska, Wojciech Penczek

Verifying Cryptographic Protocols Modeled by Networks of Automata 292  
Mirosław Kurkowski, Wojciech Penczek

Part 3. PROGRAMMING

Programming Languages

A Primitive Recursive-Descent Parser with Backtracking ................ 304  
Roman Redziejowski

An Approach to Formal Human-Oriented Specifications of Programming Languages ......................................................... 316  
Igor Anureev

A Theory of Clones and Formalized Design of Programs ................. 328  
Anatoliy Doroshenko, Georgiy Tseytlin, Olena Yatsenko, Lubov Zachariya

Static Path Compression in Timed Systems ................................. 340  
Agata Janowska, Wojciech Penczek

Concurrent Turing Machines as Rewrite Theories ..................... 352  
Berndt Farwer, Heiko Rölke, Manfred Kudlek

Distributed Object Modeling Using Object Relations in Dynamic Environments ................................................................. 364  
Goehringer Daniel
Mathematical Structures

Rough Sets in Multi Relational Environment .......................... 376
  Jaroslaw Stepaniuk

Automatic Planning Based on Rough Set Tools: Towards Supporting
  Treatment of Infants with Respiratory Failure ........................ 388
  Jan Bazan, Piotr Kruczek, Stanislaya Bazan-Socha, Andrzej Skowron,
  Jacek Pietrzyk

Local Properties of Triangular Graphs ................................. 400
  Antoni Mazurkiewicz

Star-connected rational expressions .................................. 410
  Barbara Klunder

Semilinear Sets over Commutative Semirings .......................... 418
  Manfred Kudlek

Information Systems Theory

Similarity as Nearness: Information Quanta, Approximation Spaces
  and Nearness Structures .............................................. 424
  Marcin Wolski

Nearness in Approximation Spaces ..................................... 434
  James F. Peters, Andrzej Skowron, Jaroslaw Stepaniuk

Approximation Spaces Based on Similarity and Dissimilarity ........ 446
  Anna Gomolinska

Efficient Computing Consistent and Partially Consistent Extensions of
  Information Systems ................................................... 458
  Zbigniew Suraj, Krzysztof Pancerz

Analysis of Conflict Dynamics by Risk Patterns ..................... 469
  Sheila Ramanna, James F. Peters, Andrzej Skowron

The Aim of the Open European Nephrology Science Centre - OpEN.SC . 480
  Gabriela Lindemann, Thomas Schrader, Danilo Schmidt
Conference Organisation

Programme Chairs and Local Arrangements

Hans-Dieter Burkhard, Humboldt Universität zu Berlin
Gabriela Lindemann-v.Trzebiatowski, Humboldt Universität zu Berlin
Bernd-Holger Schlingloff, Humboldt Universität / Fraunhofer FIRST

Program Committee

Hans-Dieter Burkhard (Germany)
Ludwik Czaja (Poland)
Gabriela Lindemann-v.Trzebiatowski (Germany)
Wojciech Penczek (Poland)
Andrzej Salwicki (Poland)
Bernd-Holger Schlingloff (Germany)
Andrzej Skowron (Poland)
Zbigniew Suraj (Poland)
List of Referees

The program committee gratefully acknowledges the help of the following referees in the evaluation of submitted papers.

Jochen Burghardt
Hans-Dieter Burkhard
Ludwik Czaja
Dagnar Monett Diaz
Berndt Farwer
Sibyle Froeschle
Anna Gomolinska
Natalya Gribovskaya
Agata Janowka
Magda Kacprzak
Magdalena Kacprzak
Barbara Klunder
Michael Koehler
Beata Konikowska
Manfred Kudlek
Marta Kwiatkowska
Sawomir Lasota
Gabriela Lindemann
Helmut Myritz
Artur Niewiadomski
Wieslaw Pawlowski
Wojciech Penczek
James Peters
Agata Polrola
Louchka Popova
Agata Pozrola
Roman Redziejowski
Andrzej Salwicki
Holger Schlingloff
Nikolay v. Shilov
Andrzej Skowron
Jareolaw Stepiunik
Zbigniew Suraj
Maciej Szreter
Diemo Urbig
Grzegorz Wilk
Jozef Winkowski
Zbigniew Wlodarczyk
Marcin Wolski
